PERSONAL PROFILE STATEMENT

I am a Junior Full Stack developer aspiring to be the best in web development and also aspiring to create projects that improve the lives of people and make a difference. Some of the projects I have done are in my GitHub profile. But one of my biggest project I have undertaken is creating a Tumaini Ministries Web Application which is still ongoing.

I am a committed hardworking and reliable person. I am able to demonstrate effective communication skills and organizational skills; work on my own well both independently and within a team. I take ownership of my tasks and am willing to go an extra mile to deliver and exceed expectations where possible. I am the best option because I can learn and adapt fast to whichever technology as I am very passionate about Technology. As a recent college graduate(**Electrical and Electronics engineer and Full Stack developer**), I know that what I'm lacking is career experience. However, the qualifications that I bring cannot be measured by traditional experience.

SKILLS

- > **Ruby and Rails**
- > **JavaScript and React** as it's framework
- > **HTML and CSS**
- > **Project Management**
- > **Cloud Computing (GCP)**

PROJECTS

Tumaini Ministries Center Web Application

Status: Ongoing Link: <https://tumaini-min.netlify.app/>

Other School Projects

Status: Complete Link: <https://github.com/sylvia-boyani>

2017-2021

DIP.TECH Electrical and electronics engineering (**Control and Instrumentation**) Technical University of Kenya.

Relevant modules

- Automatic process control systems 80%
- Introduction to programming 70%
- Auto-CAD 80%
- Control systems (Mat lab)50%
- Robotics 80%
- Industrial measurements 60%
- PLCs (logo) 80%

2012-2015

Mitaboni Girls Secondary School. Kenya Certificate of Secondary Studies.

Results: Mean grade **B-**

WORK EXPERIENCE

Tumaini Ministries

Current: Tumaini Ministries Center **Media and Department Head**

At this position I am currently building their website and managing all of their social media platforms.

Kenya Airports Authority

I was attached at **Kenya Airports Authority Wilson Airport** for four months . This period was for my school industrial attachment. The time at the airport I learn t how to carry out various tasks:

- **Airfield lighting system** including fault tracing re-lamping and their general maintenance.
Airfield

lightings are, lights for runway, taxiway, pa-pi's and approach lights.

- **Operating of constant current regulators** on local and remote from the control tower and at substation.
- Normal re-lamping on buildings, trouble shooting and repair of faults.
- **Replacement of faulty series transformers** for runway and Taxiways.
- **Generator test runs**, Dusting and cleaning, Fueling and minor maintenance work. To ensure that power backup was available in case of failure
- **Trouble shooting and repair** of faulty telephone extension lines.
- **Servicing of UPS machines** by cleaning and changing of batteries.
- Minor internet Networking's and Cable crimping.
- Minor installations e.g installations of sockets, fire alarms and lamp fittings.
- Operating and Maintenance of water pumps e.g Air locking solutions.
- **Writing daily reports** of the days activities and test runs done for the day.

All the tasks and projects I was assigned to I was able to do and accomplish them effectively.

ADDITIONAL INFORMATION

I have volunteered in a nearby high school in teaching Physics and Computer for a while. I also have some skills in software development using the following languages; HTML & CSS, JavaScript and React and also currently learning more languages on software development. From the volunteer works I have done and other personal projects, I learned how to multitask and prioritize responsibilities.

Some of the projects that I have worked on are on my GitHub account. <https://github.com/sylvia-boyani>

PERSONAL INTERESTS

At my free time I love mentoring young adults and teens. Sharing our life experiences together and motivating each other. During my free time I also like plaiting and hairdressing simple braids. These are some of the hobbies I like; swimming, Playing ball games, reading, watching and cooking.
